MAJOR PVC PIPES & FITTINGS

Major Pvc Pipes offers a range of Pvc pipes & fittings for complete Pvc underground drainage solutions suitable for use in a variety of applications, including reticulation mains, industrial process pipelines, effluent pipelines, slurry pipelines. The high strength to weight ratio together with exceptional resistance to corrosion or chemical attack makes these fittings ideal for major infrastructure applications.

Major Pvc pipes & fittings are manufactured according to EN1452-2 standards, complying with the requirements as set out by the European Standard Institute.

The fittings are totally compatible with SABS 791 (solid wall) and SABS 1601 (foam wall Pvc pipes)

Major Pvc Pipes provides easy-to-install, secure and reliable solutions aimed at building long-lasting networks.

FEATURES & BENEFITS

Excellent internal/external corrosion resistance

Electrically non-conductive

Dual hardness rubber ring

Lightweight
